

Hossam Hassan Hefny

Full-Stack Developer

Cairo, Egypt | 01116596635 | hossam.h.dev@gmail.com | linkedin.com/in/hossam-hassan-hefny | github.com/Hossam-hassan-h

SUMMARY

Full-Stack Developer specializing in JavaScript/TypeScript (MERN Stack, React, Express, NestJS). Experience building scalable platforms including a multi-hospital telemedicine system, a multi-tenant project management tool, and an on-demand gig economy marketplace. Skilled in PostgreSQL, MongoDB, Docker, RESTful APIs, and RBAC-driven system design.

TECHNICAL SKILLS

Languages/Frameworks: JavaScript (ES6+), TypeScript, Node.js, Express.js, NestJS, React.js, Redux Toolkit

Databases: PostgreSQL, MongoDB, MySQL, Mongoose

Architecture: Multi-Tenancy, RESTful API, RBAC, Clean Architecture

Tools/DevOps: Docker, Git, GitHub, Postman, AWS S3, Cloudinary, CI/CD, Agile/Scrum

EXPERIENCE

Full-Stack Developer Intern - Digilians

February 2026 - June 2026

- Built full-stack modules with React.js, TypeScript, and Node.js in an Agile workflow.
- Developed core business logic (escrow management, attendance tracking) for the "Sanadah" gig-economy platform.
- Designed modular REST APIs and optimized database models for scalable, zero-downtime integration.

KEY PROJECTS

Telehealth & Virtual Clinic System - NestJS, React.js, PostgreSQL, WebRTC, Docker

Client: Imam Abdulrahman Bin Faisal University - In Development (Private)

- Designing an enterprise telemedicine infrastructure interconnecting 4 university teaching hospitals, doctors, and patients.
- Implementing low-latency peer-to-peer video consultations (WebRTC) with appointment scheduling and time-slot management.
- Developing Electronic Health Record (EHR) modules covering medical histories, prescription tracking, and secure medical imaging (DICOM/X-ray) uploads and viewers.
- Structuring strict role-based access control (RBAC) and data isolation to guarantee medical confidentiality across all participating hospital units.

Sanadah - On-Demand Gig Workforce Platform - React.js, Node.js, MongoDB, Redux Toolkit

Digilians Graduation Project

Live Demo: sanda-ten.vercel.app | GitHub (Frontend): github.com/Hossam-hassan-h/sanda-front | GitHub (Backend):

github.com/Hossam-hassan-h/backend-clone-sanda

- Built a gig-economy platform connecting businesses (cafes, restaurants, event organizers) with temporary, verified labor.
- Designed the MongoDB database schema and implemented it across the codebase.
- Built and shipped the platform independently, using AI-assisted development tools to accelerate delivery.
- Implemented real-time shift management with geolocation-based check-in/check-out, working-hours logging, and automated wage settlement.
- Architected a business dispute-resolution system featuring a first 30-minute trial and refund guarantee, protecting employers while promoting qualified worker profiles.
- Integrated dynamic matching filters, worker rating/review algorithms, and automated notifications for job acceptance.

Project Tracker & Workspace Management System - React.js, Node.js, PostgreSQL, Tailwind CSS

Client: Imam Abdulrahman Bin Faisal University

Live Demo: project-traker.vercel.app

- Architected a multi-tenant project management platform with isolated workspaces and granular role permissions (Owner, Manager, Member).
- Developed a dynamic task progression engine with interactive timeline tracking, milestone dependencies, and status workflows.
- Integrated multi-format file attachment pipelines, real-time activity feeds, and administrative performance dashboards.

Grocery & Fresh Produce E-Commerce Platform - MERN Stack, Redux Toolkit

Client Project - Palestine

Live Demo: soogkasem.com

- Developed an end-to-end e-commerce engine supporting unit-weight pricing (Kg/g), seasonal stock variations, and custom category trees.
- Designed dynamic loyalty reward-point calculations and coupon discount engines manageable via a central admin dashboard.
- Built full order fulfillment lifecycles, user reviews, and sales analytics reporting.

E-Learning & Video Streaming Platform - React.js, Node.js, MongoDB

Independent Initiative

Live Demo: meshmoparmeg-front.vercel.app | GitHub (Frontend): github.com/Hossam-hassan-h/meshmoparmeg-front | GitHub (Backend): github.com/Hossam-hassan-h/backend-meshmoparmeg

- Developed a free community e-learning platform delivering structured programming curriculum for secondary/Baccalaureate students.
- Integrated optimized video streaming workflows with adaptive playback quality and protected media storage.
- Built automated quiz evaluation engines, student progress trackers, and full admin authoring tools.

EDUCATION

- Bachelor's Degree - Beni Suef University (2021 - 2025)

CERTIFICATIONS

- Full-Stack Web Development Track - Digilians, 2026
- Meta Front-End Developer Professional Certificate - Meta (Coursera)
